

PLATFORM Policy Briefs

Kees Kwant, Stefan Lampel

During its current course, PLATFORM will publish at least three policy briefs to communicate results of analysis and discussions to decision makers at national and European level. The policy briefs are produced in frame of the Work package 2 Policy: “Bottom-up recommendations to improve impact”.

The intention of policy briefs is to support and inform national programme owners and managers in their endeavours towards better coordination, the need for P2P cooperation and also towards opening up to currently underrepresented Member States that would be interested to join.

The actors within the existing ERA-NETs and JPIs have, collectively, a good oversight and expertise and are well-positioned to explore opportunities for collaboration, as well as to give recommendations on new networks needed.

Policy briefs are available at: <http://era-platform.eu/publications/policy-briefs/>

Policy Brief No. 1 P2P instruments

The future of cooperation and collaboration in public-public partnerships between Member States –'Think Back, Act Forward'

Policy Brief No. 2 Co-creation of a Global Bioeconomy

In Policy Brief No. 2 “Co-creation of a Global Bioeconomy” PLATFORM partners propose the ERA-NET instrument and give several recommendation to address the societal challenges of the 21st century on a global scale.

Policy Brief No. 3: Proposed: Inclusiveness

The following subjects for the next Policy brief could be considered:

1. Inclusiveness, Involvement of EU13 in Cofunds
2. Bioeconomy Manifesto, Add recommendations about R&D
3. Innovation alignment of instruments

It was agreed that Topic 1, as an outcome of this Annual meeting would be taken up and that Kim Turk and Martin Greimel would start the writing of the Policy Brief.
